

Yamal LNG Begins Shipments from the Second LNG Train

Sabetta, 9 August 2018. OAO Yamal LNG ("Yamal LNG") has shipped the first liquefied natural gas (LNG) cargo after commissioning initial production from the second train at the plant's nameplate capacity. To date, 47 LNG cargoes have been offloaded with more than 3.5 million tons of LNG produced from the project.

"Using the experience of the first LNG train, we have managed to complete construction and commissioning of the second train significantly ahead of schedule" according to Yamal LNG General Director Evgeny Kot. "The first LNG from the second train dropped on the 21st July, just 8.5 days after the first natural gas was input into the train. Currently, the second LNG train is working at its rated nameplate capacity, and has already produced more than 250 thousand tons of LNG during its initial commissioning."

Note

Yamal LNG is constructing a 17.4 mmtpa natural gas liquefaction plant utilizing the hydrocarbon resources of the South-Tambeyskoye field on the Yamal peninsula located in the Arctic territory of the Russian Federation. The first LNG train commenced LNG production in the fourth quarter 2017 with the loading of the inaugural tanker on 8 December 2017. Yamal LNG shareholders include: PAO NOVATEK (50.1%), Total (20%), CNPC (20%), and the Silk Road Fund (9.9%).
