

Yamal LNG Statement for Partners

It has come to our attention that recent media publications contained misinformation alleging that LNG carriers chartered by Yamal LNG are used, inter alia, to load products from Arctic LNG 2. These statements are either a gross error or a deliberate attempt at defamation by the media and the so-called "experts" engaged by them.

Yamal LNG will take all steps to thwart such publication and dissemination of misinformation intended to cause damage to the Company, and will protect its interests in court.

Note

Yamal LNG operates a 17.4 mtpa natural gas liquefaction plant comprised of three LNG trains of 5.5 mtpa each and one LNG train of 900 thousand tons per annum, utilizing the hydrocarbon resources of the South-Tambeyskoye field in the Russian Arctic.
